Overview

CounterPath's eyeBeam 1.5 for Windows is a multimedia communicator designed to enhance the user's communications experience in Voice over IP. Whether you are a consumer or Small Office/Home Office (SOHO) user, eyeBeam allows you to stay connected and manage your calls and availability with a comprehensive suite of carrier-grade Voice, Video, IM and Presence features.

Whether you are having a simple voice conversation or hosting a conference call with multiple collaborative applications, eyeBeam calling software offers users the ability to personalize your softphone and manage your availability.

Benefits

- Intuitive user interface makes it easy for both novice and power users to make and receive calls, initiate video conferencing, and communicate using Instant Messaging.
- Flexible skinning engine designed to give Service Providers and Equipment Manufacturers the ability implement a co-branded or private label solution to market.
- Rapid Market Deployment is guaranteed with eyeBeam's open standards based architecture that integrates with 3rd party platforms to make customer implementations seamless and smooth.
- Simplified integration with SIP and other VoIP applications allow for unique and customized deployment of multi-

\$45.00 (USD)
